

David Fries – IPHA President 1996

It was an honor to serve as the President of the Iowa Public Health Association for the year of 1976-77. It was a pleasure to work with my co-chair Kevin Anderson representing the Iowa Environmental Health Association. The conference planning committee was great to work with to develop and host a successful annual conference. The year went by fast as we continue to advance the many agendas of the Associations.

All of us in Public Health continued to work to improve the health of Iowans and help to grow the Association. As a voice to advance the many Public Health issues then and now we need to continue to be strong in our message and direction as we were in 1976-77 and the many years before and after.

Keep up the great effort.

David J. Fries
